

COVID-19

OUR LATEST POLICY | UPDATE 23/09/2020

Here's a summary of our safety measures (now updated following the September guidance) as worked on by our management & staff together,

Safety Measures

Smartphone Table Service

Order food & drinks from your phone to the table. No queuing or going to the bar required. This limited the amount of people moving around the venue and allows for social distancing between tables.

Face Coverings

Face coverings are required before entering the premises and kept on until you are seated at your allocated table. If you forget to bring a covering we have them available free of charge. If you are exempt please let us know before your visit to avoid any confusion.

Electronic Track & Trace

Every transaction with data is stored for 21 days to assist in the Track & Trace scheme should we ever need it. The NHS Test & Trace barcode is available to check-in should you wish to take part in the scheme.

Table Reservations & Limited Capacity

Our overall capacity has been reduced and we are now taking reservations for both food, or just drinks. Guests will require a table number to be served. Groups are limited to no more than 6 and we request that everyone stick to the latest household guidance.

Extra Cleaning & Hygiene

All tables are cleaned with anti-bacterial cleaner after each visit. Hand sanitisers are readily available particularly on entrance & exit.

We would like to thank everyone for their support during these times it means a great deal to us.
